DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 7-11 and 27/1/7, drawn to determine the texture for multiple graphics nodes, classified in class 345, subclass 582.
- II. Claims 12-13 and 27/12, drawn to graphics cache memory, classified in class 345, subclass 557.
- III. Claims 24-26 and 27/24, drawn to graphics texture memory, classified in class 345, subclass 552.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group I has separate utility such as a method for determine the texture for multiple graphics nodes without a graphics cache memory or a graphics texture memory. In other word, each one of the inventions recited in groups I, II and II is separately usable in a system not having the other. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37 DFR 1.143).
